ELECTIVIST – A Novel Tool to Book Elective Caesarean Sections

Kit Robertson ST5 O&G, Milton Keynes Hospital,
Miss Aparna Reddy, Buckinghamshire NHS Trust
8th November 2017

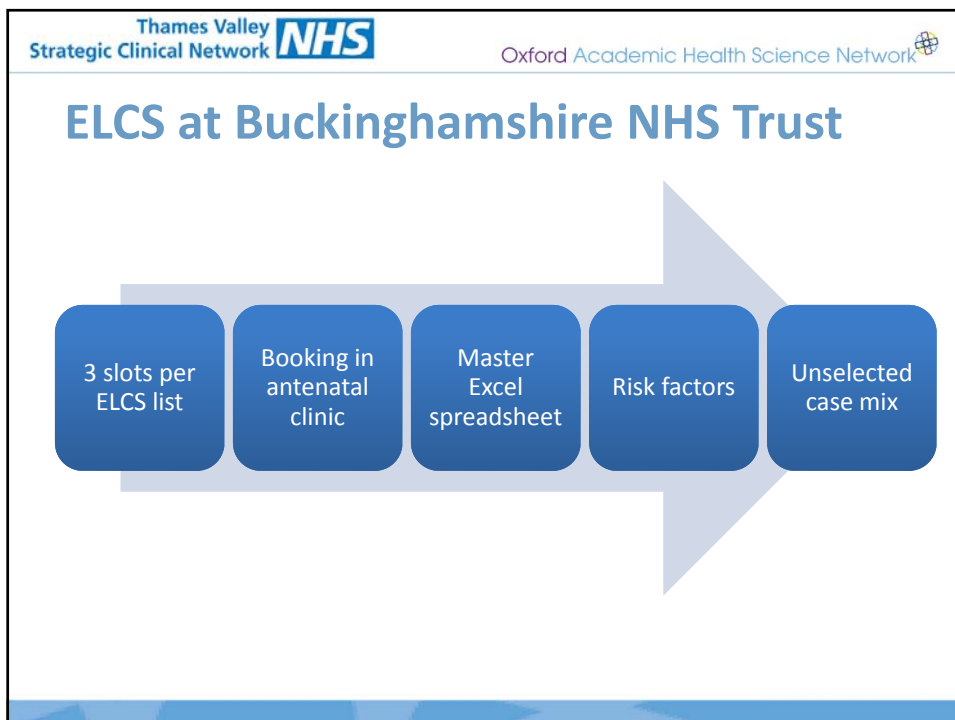

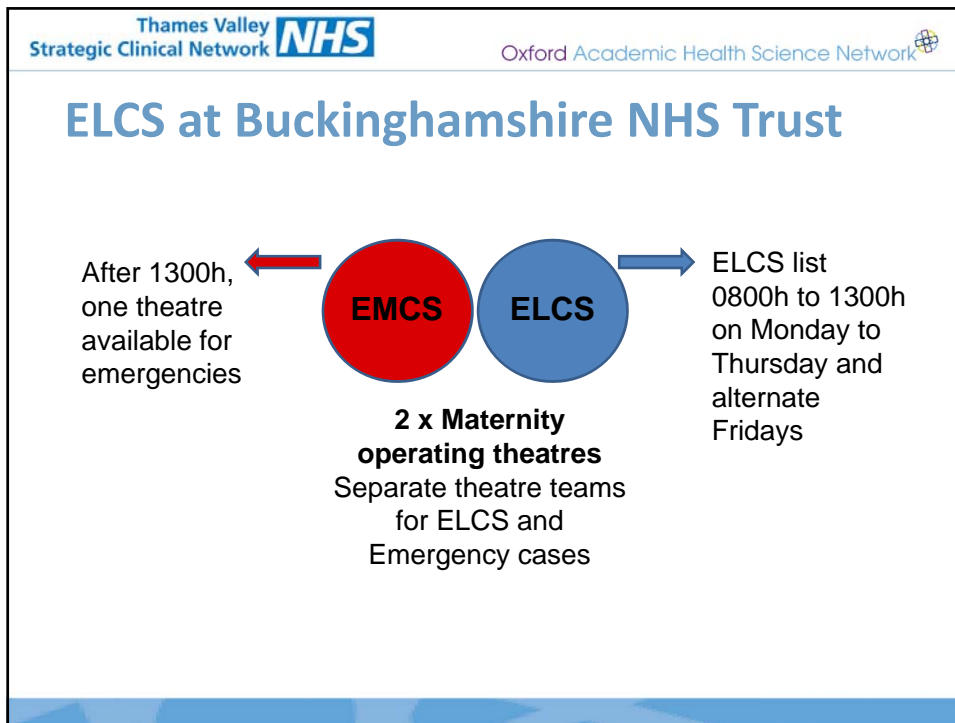

Thames Valley Strategic Clinical Network  Oxford Academic Health Science Network 

Agenda

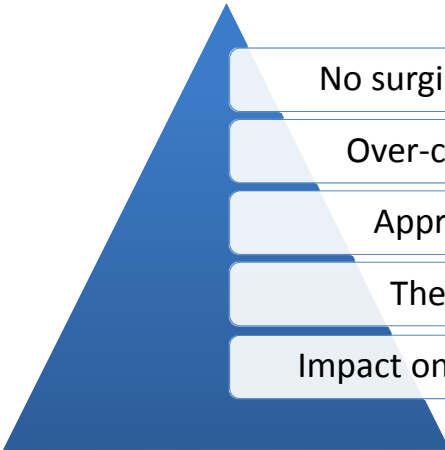

- Background
- Design
- Implementation
- Outcomes
- Learning and Reflections

Thames Valley Strategic Clinical Network **NHS** Oxford Academic Health Science Network

Issues with ELCS Process

No surgical risk assessment

Over-complex ELCS lists

Appropriate staffing

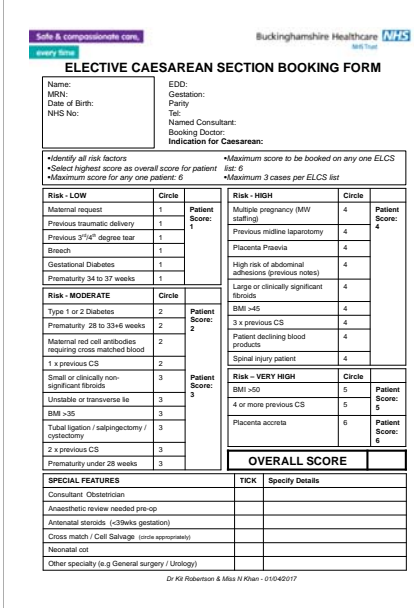

Theatre Over-Run

Impact on Emergency Theatre

Thames Valley Strategic Clinical Network **NHS** Oxford Academic Health Science Network

ELCS Booking Form

- Risk assessment by clinician at booking
- Identification of all risk factors
- Highest risk score allocated as overall score to each case (1 to 6)
- Max total score on any one ELCS list: 6
- Max 3 cases per list

Safe & compassionate care, every time

Buckinghamshire Healthcare **NHS**

ELECTIVE CAESAREAN SECTION BOOKING FORM

Name: _____ EDD: _____
 MRN: _____ Gestation: _____
 Date of Birth: _____ Parity: _____
 NHS No: _____ Tel: _____
 Named Consultant: _____
 Booking Doctor: _____
 Indication for Caesarean: _____

Identify all risk factors
 *Select highest score as overall score for patient
 *Maximum score for any one patient: 6

Risk - LOW		Circle	Patient Score	Risk - HIGH		Circle	Patient Score
Maternal request	1			1	Multiple pregnancy (M/M staffing)	4	
Previous traumatic delivery	1		Previous midline laparotomy		4		
Previous 2nd/3rd degree tear	1		Placenta Praevia		4		
Breech	1		High risk of abdominal adhesions (previous notes)		4		
Gestational Diabetes	1		Large or clinically significant fibroids		4		
Pretermaturity 34 to 37 weeks	1						
Risk - MODERATE		Circle	Patient Score	Risk - VERY HIGH		Circle	Patient Score
Type 1 or 2 Diabetes	2			BMI >45	4	5	
Pretermaturity 28 to 33+6 weeks	2			3 x previous CS	4		
Maternal red cell antibodies requiring cross matched blood	2			Patient declining blood products	4		
1 x previous CS	2			Spinal injury patient	4		
Small or clinically non-significant fibroids	3						
Uterus in situ or transverse lie	3						
BMI >35	3						
Tubal ligation / salpingectomy / cystectomy	3						
2 x previous CS	3						
Pretermaturity under 28 weeks	3						
				OVERALL SCORE			

SPECIAL FEATURES **TICK** **Specify Details**

Consultant: Obstetrician

Anaesthetic review needed pre-op

Antenatal steroids (<39wks gestation)

Cross match / Cell Salvage (write approximate)

Neonatal cot

Other speciality (e.g. General surgery / Urology)

Dr KJ Robertson & Miss N Khan - 014942017

Risk Assessment

Risk - LOW	Circle	
Maternal request	1	Patient Score: 1
Previous traumatic delivery	1	
Previous 3 rd /4 th degree tear	1	
Breech	1	
Gestational Diabetes	1	
Prematurity 34 to 37 weeks	1	

Thames Valley Strategic Clinical Network **NHS** Oxford Academic Health Science Network

Risk Assessment

Risk - MODERATE	Circle		Risk - MODERATE	Circle	
Type 1 or 2 Diabetes	2	Patient Score: 2	Small or clinically non-significant fibroids	3	Patient Score: 3
Prematurity 28 to 33+6 weeks	2		Unstable or transverse lie	3	
Maternal red cell antibodies requiring cross matched blood	2		BMI >35	3	
1 x previous CS	2		Tubal ligation / salpingectomy / cystectomy	3	
		2 x previous CS	3		
		Prematurity under 28 weeks	3		

Thames Valley Strategic Clinical Network **NHS** Oxford Academic Health Science Network

Risk Assessment

Risk - HIGH	Circle	
Multiple pregnancy (MW staffing)	4	Patient Score: 4
Previous midline laparotomy	4	
Placenta Praevia	4	
High risk of abdominal adhesions	4	
Large or clinically significant fibroids	4	
BMI >45	4	
3 x previous CS	4	
Patient declining blood products	4	
Spinal injury patient	4	

Thames Valley Strategic Clinical Network **NHS** Oxford Academic Health Science Network

Risk Assessment

Risk - VERY HIGH	Circle	
BMI >50	5	Patient Score: 5
4 or more previous CS	5	
Placenta accreta	6	Patient Score: 6

Thames Valley Strategic Clinical Network **NHS** Oxford Academic Health Science Network

Validation of Risk Score

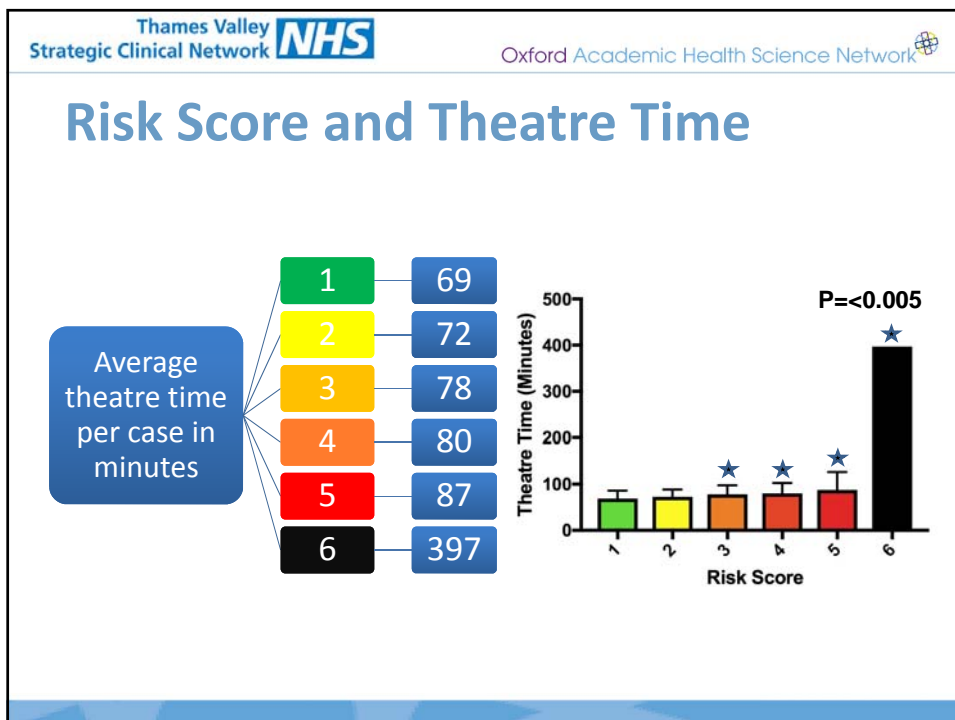

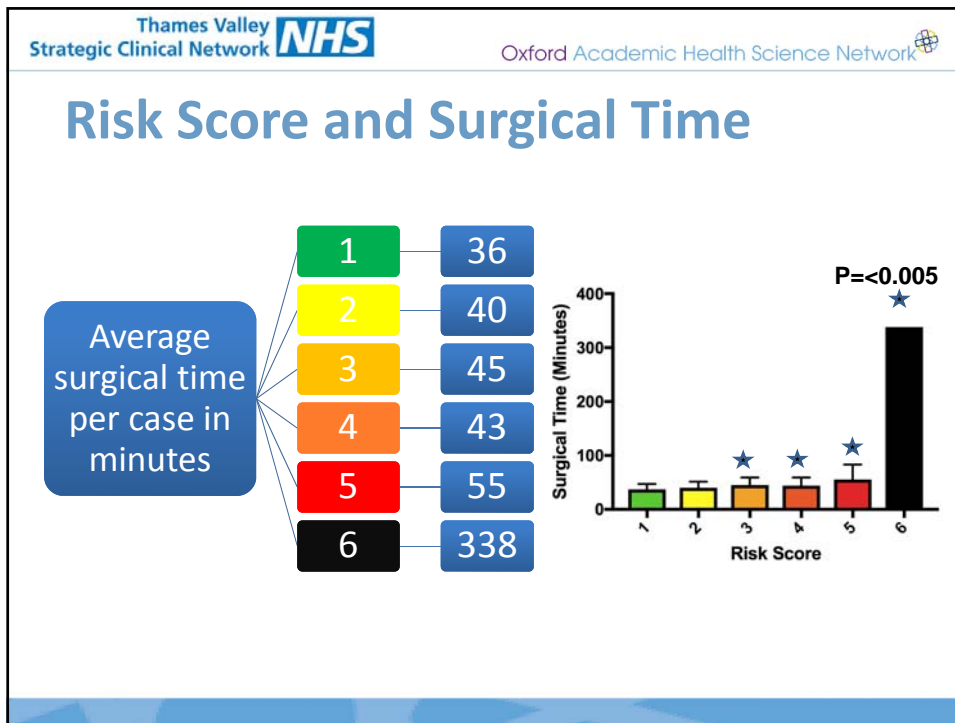

- Retrospective analysis of all ELCS performed in 2016
- Data collected from existing booking details on ELCS booking Excel spreadsheet
- Patient risk scores calculated using new booking form
- Surgical and theatre time data collected from Bluespier theatre records

Implementation of ELECTIVIST

- Introduction of ELCS booking form (April 2017)
- Staff training
- Booking spreadsheet modified
- New risk score and total list score columns
- Colour coding to alert booking clinician if list overbooked
- Overbooking permitted if named senior clinician reviewed list complexity and agreed

Further improvements

- Improving staff training with risk scoring system
- ELCS booking form as part of induction process for new doctors
- Further modifications to booking spreadsheet to make data entry easier

Learnings and Reflections

- Excellent support from all stakeholders
- Overbooking continued initially due to capacity issues, now resolving
- Minimal disruption to service due to modification of existing system
- Early data suggests improved efficiency and reduction in clinical risk due to over-run
